Language: English (mainly)

Class time: F6F7 *Location:* DELTA 台達 217

Course Description:

This seminar course offers the latest research topics in a wide range of fields related to photonics, optics, and related disciplines from academia to industry.

Class rules:

1. Be present **on time**. The classroom doors will be locked after 14:20 if the speaker is ready.
2. Keep **silent** during the talk except for raising questions. Mute your cell phone. No cross-talk.

Grading policy:

1. All students have **65 points** as default.
2. Raising a question gives you **3 points**.
3. Being seated in the “first class region” entitles you to get double points (**6 points**) when you ask a question.
4. Actively contacting with a speaker and getting his/her oral or electronic recommendation can earn you **7 points**.
5. Violating class rules may cost your grades.
6. Roll call will be conducted regularly or irregularly in some ways. Absence without prior permission costs you **6 points**. Double roll call may be irregularly conducted. If virtual attendance is found, you will get failed for sure.

* These rules may be adjusted and modified when necessary.

Comments:

1. No report is required. However, only a few sentences summarizing your impressions and what you have learned may be irregularly requested as proof of your attendance.
2. Feel free to ask a question; not just attend but actively participate in the seminar.
