

```
#include <iostream>
#include <vector>
#include <cmath>

using namespace std;

main()
{
    vector<int> A = {1, 2, 3, 4, 5};
    for(auto i: A) {
        cout << pow(i, 3) << endl;
        cout << cos(i) << endl;
    }
}
```
